Work Experience

Front end developer (React & Next js)   Jul 2024 - Present
MMTech Company

Education

Faculty of computer science and information systems   Jan 2019-Dec 2023
Bachelor Computer Science

Projects

LiBooking
As a Front-end Developer, I built the UI for LiBooking, a modern hotel booking platform using React, TypeScript, and Tailwind CSS. I implemented i18n, animations, maps integration, secure auth, real-time booking, and optimized the app with reusable components, Redux Toolkit, and Recharts for data visualization.

Share Me
Full stack social media website application, with share me you can upload and download images and also you can make comment or save anything, the website has a smart login and profile page it's
